MULTIPLE CHOICE

1. Which statement is MOST true?
   a. Sexology as a science began with Sigmund Freud.
   b. Scientists in the United States have found that understanding and predicting the sexual behavior of those in other countries is not particularly useful.
   c. The field of sexology, unlike other sciences, has not been able to help control behavior in any major way.
   d. In spite of the vast amount of knowledge sexologists have learned, many questions about human sexual behavior remain unanswered.

   ANS: D  REF: The Goals of Sexology  OBJ: 02-01
   MSC: TYPE: Factual

2. All of the following are goals of sexologists EXCEPT:
   a. understanding sexual behavior.
   b. promoting sexual behavior.
   c. predicting sexual behavior.
   d. controlling sexual behavior.

   ANS: B  REF: The Goals of Sexology  OBJ: 02-01
   MSC: TYPE: Factual

3. The role of sexology is to:
   a. publish material that is interesting and entertaining to the public.
   b. test assumptions about sexuality in a scientific way.
   c. study only those behaviors that can be electronically quantified.
   d. study sex and sexuality in the United States to avoid bias through cultural influences.

   ANS: B  REF: The Goals of Sexology  OBJ: 02-01
   MSC: TYPE: Factual

4. Which of the following goals of sexology is MOST difficult to comprehend?
   a. controlling sexual behavior
   b. predicting sexual behavior
   c. defining sexual behavior
   d. understanding sexual behavior

   ANS: A  REF: The Goals of Sexology  OBJ: 02-01
   MSC: TYPE: Factual

5. A science writer hears of a 35-year-old male who lost his penis at circumcision. He interviews all the family members, reads medical records, and writes a book about the topic. This is MOST likely an example of which of the following?
   a. sexology
   b. developmental psychology
   c. experimentation
   d. humanism

   ANS: A  REF: The Goals of Sexology  OBJ: 02-01
   MSC: TYPE: Application
6. The pioneering work of Alfred Kinsey took place only in the late:
   a. 1930s and early 1940s.
   b. 1940s and early 1950s.
   c. 1950s and early 1960s.
   d. 1960s and early 1970s.
   ANS: B  REF: The Goals of Sexology  OBJ: 02-01
   MSC: TYPE: Factual  NOT: NEW

7. The survey method:
   a. allows for flexibility in data-gathering procedures.
   b. is objective and largely eliminates problems of demographic bias.
   c. can be done with the use of technology such as computers.
   d. can only be generalized to the people who were actually surveyed.
   ANS: C  REF: Nonexperimental Research Methods
   OBJ: 02-02  MSC: TYPE: Factual

8. Which of the following is NOT true of surveys?
   a. They can establish cause-and-effect relationships.
   b. They allow researchers to gather data from large samples.
   c. They tend to be more cost-efficient than other types of research.
   d. The results obtained from surveys are more generalizable than those obtained from case studies.
   ANS: A  REF: Nonexperimental Research Methods
   OBJ: 02-02  MSC: TYPE: Factual

9. In which type of research is a representative sample of people asked to answer questions about their sexual attitudes or behaviors by means of questionnaires or interviews?
   a. case study
   b. survey
   c. direct observation
   d. experiment
   ANS: B  REF: Nonexperimental Research Methods
   OBJ: 02-02  MSC: TYPE: Factual

10. Most of our scientific information about human sexuality has been obtained through:
    a. case studies.
    b. surveys.
    c. direct observation.
    d. experimental research.
    ANS: B  REF: Nonexperimental Research Methods
    OBJ: 02-02  MSC: TYPE: Factual

11. Which research method would be MOST appropriate for investigating the relationship between the religious beliefs of Americans and their attitudes toward sex education in the schools?
    a. case study
    b. experimental method
    c. direct observation
    d. survey
    ANS: D  REF: Nonexperimental Research Methods
    OBJ: 02-02  MSC: TYPE: Application
12. Which of the following is a method used to conduct surveys?
   a. telephone interviews
   b. the Internet
   c. door-to-door interviews
   d. all of the above

   ANS: D  REF: Nonexperimental Research Methods
   OBJ: 02-02  MSC: TYPE: Factual

13. Which of the following is NOT associated with the survey research method?
   a. independent variable
   b. nonresponse
   c. questionnaires
   d. generalization

   ANS: A  REF: Nonexperimental Research Methods
   OBJ: 02-02  MSC: TYPE: Factual

14. An advantage of the direct observation method is that:
   a. it essentially eliminates the possibility of data falsification by research subjects.
   b. it provides a controlled environment for managing relevant variables.
   c. it involves the unbiased participation of the researchers.
   d. the subjects' behavior is rarely affected by the observation techniques employed.

   ANS: A  REF: Nonexperimental Research Methods
   OBJ: 02-02  MSC: TYPE: Factual

15. What is a disadvantage of the direct observational method of research?
   a. The subjects' behaviors may be influenced by the presence of an observer.
   b. It is impossible to generalize the findings to the target population.
   c. You can only study one subject at a time.
   d. The measurements obtained through this method are entirely subjective.

   ANS: A  REF: Nonexperimental Research Methods
   OBJ: 02-02  MSC: TYPE: Factual

16. Direct observation is a reliable method for studying sexuality because the possibility of ____ is greatly reduced.
   a. demographic bias
   b. researcher interpretive bias
   c. data falsification
   d. self-selection

   ANS: C  REF: Nonexperimental Research Methods
   OBJ: 02-02  MSC: TYPE: Factual

17. Which of the following would be the most cost-effective method for conducting a survey?
   a. face-to-face interviews
   b. telephone surveys
   c. questionnaires
   d. door-to-door interviews

   ANS: C  REF: Nonexperimental Research Methods
   OBJ: 02-02  MSC: TYPE: Factual
18. In a(n) ____ sample, subgroups are represented according to their incidence in the larger population.
   a. survey
   b. equivalent
   c. random
   d. representative

   ANS: D
   OBJ: 02-03
   MSC: TYPE: Factual

19. A representative sample is also known as a:
   a. target sample.
   b. random sample.
   c. volunteer sample.
   d. probability sample.

   ANS: D
   OBJ: 02-03
   MSC: TYPE: Factual

20. The results of the National Health and Social Life Survey reflect an American people who are:
   a. less content with their erotic lives than was widely believed.
   b. more sexually active than was widely believed.
   c. more sexually conservative than was widely believed.
   d. indulgent in all kinds of conventional and unconventional sexual practices.

   ANS: C
   OBJ: 02-03
   MSC: TYPE: Factual
   NOT: NEW

21. In order to learn about the sexual attitudes and behaviors of all the students attending Cleveland High School, Professor Brewer randomly selected and surveyed 50 of the students. In this case, all of the students attending the high school are called the:
   a. target population.
   b. dependent variable.
   c. representative sample.
   d. independent variable.

   ANS: A
   OBJ: 02-03
   MSC: TYPE: Application

22. In order to generalize accurately, it is important to survey a ____ sample of cases.
   a. self-selected
   b. target
   c. representative
   d. random

   ANS: C
   OBJ: 02-03
   MSC: TYPE: Factual

23. In written or oral surveys, a relatively small group, called the ____, is used to draw conclusions about a larger group, called the ____.
   a. experimental group; control group
   b. random sample; representative sample
   c. representative sample; target population
   d. dependent variable; independent variable

   ANS: C
   OBJ: 02-03
   MSC: TYPE: Application
24. Which of the following is an advantage of using questionnaires instead of interviews?
   a. The researcher can develop a rapport with the subject.
   b. They provide opportunities for flexibility.
   c. They are usually anonymous.
   d. They usually have a longer timeline and are more thorough.

   ANS: C  REF: Nonexperimental Research Methods
   OBJ: 02-04  MSC: TYPE: Factual

25. Questionnaires and interviews:
   a. both involve asking a set of questions.
   b. may involve multiple-choice, true or false, or discussion questions.
   c. allow subjects to respond alone, in their own homes, or with a researcher.
   d. have all of the above characteristics.

   ANS: D  REF: Nonexperimental Research Methods
   OBJ: 02-04  MSC: TYPE: Factual

26. Interviews have an advantage over questionnaires in that:
   a. the format of an interview is preset.
   b. the interviewer can clarify confusing questions.
   c. the sequence of questions remains constant.
   d. it is not necessary to establish a rapport with the subject.

   ANS: B  REF: Nonexperimental Research Methods
   OBJ: 02-04  MSC: TYPE: Factual

27. Which of the following is an advantage of using interviews instead of questionnaires?
   a. They provide opportunities for flexibility.
   b. They are less expensive than administering questionnaires.
   c. They preserve anonymity.
   d. Subjects are less likely to distort information with an interviewer.

   ANS: A  REF: Nonexperimental Research Methods
   OBJ: 02-04  MSC: TYPE: Factual

28. Assume that you wanted to research a sensitive subject and that you planned to have a fairly large sample size. Helping the respondents to feel at ease as well as giving them an opportunity to elaborate on their answers is crucial. Adequate funding for your study is not a problem. Which of the following research methods would BEST suit your needs?
   a. case study
   b. questionnaire
   c. experimental research
   d. survey by interview

   ANS: D  REF: Nonexperimental Research Methods
   OBJ: 02-04  MSC: TYPE: Application
29. One of the problems with sex survey research is ____, which occurs when a person refuses to participate in a study.
   a. nonresponse
   b. low self-esteem
   c. the bystander effect
   d. diffusion of responsibility

   ANS: A  REF: Nonexperimental Research Methods
   OBJ: 02-05  MSC: TYPE: Factual

30. The degree to which research data may be biased as a result of the differences in the people who volunteer to participate in a study, as opposed to those who do not, is called:
   a. the bystander effect.
   b. self-selection.
   c. demographic bias.
   d. ethnocentrism.

   ANS: B  REF: Nonexperimental Research Methods
   OBJ: 02-05  MSC: TYPE: Factual

31. Several studies indicate that volunteers for sex research tend to:
   a. demonstrate less sexual interest and activity than non-volunteers.
   b. be more sexually experienced than non-volunteers.
   c. have lower levels of sexual self-esteem than non-volunteers.
   d. be in long-term, committed relationships more than non-volunteers.

   ANS: B  REF: Nonexperimental Research Methods
   OBJ: 02-05  MSC: TYPE: Factual

32. Research (Boynton, 2003; Plaud et al., 1999) suggests that:
   a. male sex research samples may be more influenced by volunteer bias than female samples.
   b. female sex research samples may be more influenced by volunteer bias than male samples.
   c. men are less likely than women to volunteer for sex research.
   d. men and women are equally likely to volunteer for sex research.

   ANS: B  REF: Nonexperimental Research Methods
   OBJ: 02-05  MSC: TYPE: Application  NOT: NEW

33. Studies suggest that all of the following are characteristics of persons who volunteer for sex research EXCEPT
   a. volunteers are more sexually experienced than non-volunteers.
   b. males are more likely to volunteer than females.
   c. college students are more willing to volunteer.
   d. volunteers hold more positive attitudes toward sexuality.

   ANS: C  REF: Nonexperimental Research Methods
   OBJ: 02-05  MSC: TYPE: Factual
34. A local radio talk show host asks his listeners to call in and report how frequently they engage in sexual intercourse. Which of the following BEST describes the validity of this information?
   a. Because a random sample of the audience will call in, this will be valid information.
   b. Because this is considered a demographically balanced sample, the information will be valid.
   c. Because the host is utilizing the experimental method instead of the survey method, the information will not be valid.
   d. Because this sample is not representative of the community, it will not be valid.

   ANS: D  REF: Nonexperimental Research Methods
   OBJ: 02-05 MSC: TYPE: Application

35. Data for the National Survey of Sexual Health and Behavior (NSSHB) were collected via:
   a. paper-and-pencil questionnaire.
   b. the Internet.
   c. face-to-face interview.
   d. the traditional phone survey.

   ANS: B  REF: Nonexperimental Research Methods
   OBJ: 02-05 MSC: TYPE: Factual

36. The fact that the majority of participants in sex research have been white, middle-class volunteers illustrates the problem of:
   a. random sampling.
   b. probability sampling.
   c. demographic bias.
   d. data discrimination.

   ANS: C  REF: Nonexperimental Research Methods
   OBJ: 02-05 MSC: TYPE: Factual

37. You are conducting a large scale sex survey and want to ensure that the results are representative of the larger population. In other words, you want to minimize the problem of:
   a. ethnographic bias.
   b. replicability.
   c. demographic bias.
   d. equivalent sampling.

   ANS: C  REF: Nonexperimental Research Methods
   OBJ: 02-05 MSC: TYPE: Application

38. Kinsey and his associates obtained their data on sexuality by means of:
   a. direct observation.
   b. case studies.
   c. experimental research.
   d. survey interviews.

   ANS: D  REF: Nonexperimental Research Methods
   OBJ: 02-06 MSC: TYPE: Factual
39. Who conducted the first extensive survey of American sexual behaviors?
   a. Masters and Johnson
   b. Kinsey
   c. Hefner
   d. Havelock Ellis

   ANS: B  REF: Nonexperimental Research Methods
   OBJ: 02-06  MSC: TYPE: Factual

40. Kinsey's studies on American sexuality were pioneering but limited, because his sample included _____.
   a. a disproportionate number of better educated persons.
   b. non-volunteers.
   c. large numbers of rural dwellers.
   d. mostly older adults.

   ANS: A  REF: Nonexperimental Research Methods
   OBJ: 02-06  MSC: TYPE: Factual

41. Which of the following statements regarding Kinsey's research is FALSE?
   a. His sample contained a disproportionately greater number of better-educated, city-dwelling Protestants.
   b. African Americans were omitted from his sample.
   c. All of the respondents were married and age 30 or older.
   d. All of Kinsey's subjects were volunteers.

   ANS: C  REF: Nonexperimental Research Methods
   OBJ: 02-06  MSC: TYPE: Factual

42. Which of the following statements regarding Kinsey's research is TRUE?
   a. Approximately two thousand men and women were included in the final subject population.
   b. The study population was a representative sample of the American population at the time.
   c. He published one report on male sexuality and another one on female sexuality.
   d. He used a variety of research methods to obtain his data.

   ANS: C  REF: Nonexperimental Research Methods
   OBJ: 02-06  MSC: TYPE: Factual

43. Which of the following groups was overrepresented in the Kinsey studies?
   a. educated, city-dwelling Protestants
   b. low-income, urban Catholics
   c. low-income, city-dwelling Protestants
   d. African Americans and other ethnic minorities

   ANS: A  REF: Nonexperimental Research Methods
   OBJ: 02-06  MSC: TYPE: Factual

44. Which of the following statements MOST accurately describes Kinsey's research?
   a. It discovered the causes of sexual dysfunction in men and women.
   b. It described the physiology of sexual behavior in women and men.
   c. It described patterns of sexual behavior in men and women.
   d. It reported the incidence of deviant sexual behavior in men.

   ANS: C  REF: Nonexperimental Research Methods
   OBJ: 02-06  MSC: TYPE: Factual
45. Which of the following studies provided one of the most expansive, nationally representative studies of sexual behavior and condom use to date?
   a. Kinsey studies
   b. Masters & Johnson studies
   c. NHSLS survey
   d. NSSHB survey
   
   ANS: D  REF: Nonexperimental Research Methods
   OBJ: 02-07  MSC: TYPE: Factual  NOT: NEW

46. The National Health and Social Life Survey is considered noteworthy because:
   a. large numbers of prostitutes and their clients agreed to participate.
   b. it examined the sexual practices of teenagers.
   c. it yielded data that most social scientists believe reliably indicate the sexual practices of most American adults ages 18 to 59.
   d. new physiological recording devices were utilized.
   
   ANS: C  REF: Nonexperimental Research Methods
   OBJ: 02-07  MSC: TYPE: Factual

47. For which of the following is the National Health and Social Life Survey BEST known?
   a. A low level of nonresponse and good demographic balance of the survey population
   b. Use of the direct observation method and broadest range of information about human sexual behavior to date
   c. Case studies of over 1500 individuals regarding their sexual histories and experiences
   d. Survey results that indicated American people are much more sexually active than was previously believed
   
   ANS: A  REF: Nonexperimental Research Methods
   OBJ: 02-07  MSC: TYPE: Factual

48. Which statement is NOT true of the National Health and Social Life Survey?
   a. The NHSLC was a large, federally funded project.
   b. The NHSLC was carried out by a team of researchers from the University of Chicago.
   c. Too few members of Jews, Asian Americans, and Native Americans were included to provide useful information about these groups.
   d. More than 75% of the people contacted agreed to participate.
   
   ANS: A  REF: Nonexperimental Research Methods
   OBJ: 02-07  MSC: TYPE: Factual

49. Many researchers consider which of the following to be the single best survey conducted of adult sexual behavior to date?
   a. Kinsey's research
   b. Masters and Johnson's research
   c. The National Health and Social Life Survey
   d. The National Survey of Sexual Health and Behavior
   
   ANS: D  REF: Nonexperimental Research Methods
   OBJ: 02-07  MSC: TYPE: Factual
50. Survey studies of various populations of men have indicated that exposure to sexually violent pornography may lead to all of the following EXCEPT:
   a. reduced sensitivity to rape victims.
   b. increased tolerance for sexually aggressive behavior.
   c. greater acceptance of the myth that women want to be raped.
   d. increased arousal (as measured physiologically) in nonviolent sexual encounters.

ANS: D  REF:  Nonexperimental Research Methods
OBJ:  02-09  MSC:  TYPE: Factual

51. Evidence from some case studies suggests that at least among chronic alcoholics subjects have shown:
   a. decreased arousability but heightened sexual interest.
   b. increased arousability and sexual interest.
   c. decreased arousability and lowered sexual interest.
   d. increased arousability but lowered sexual interest.

ANS: C  REF:  Nonexperimental Research Methods
OBJ:  02-09  MSC:  TYPE: Factual

52. Which of the following statements regarding Masters and Johnson's research is TRUE?
   a. Their subjects were required to pay to participate in the study.
   b. Their final sample population consisted primarily of individuals with above average intelligence from an academic community.
   c. They employed the case study method of research.
   d. They employed the survey method of research.

ANS: B  REF:  Nonexperimental Research Methods
OBJ:  02-10  MSC:  TYPE: Factual

53. The book *Human Sexual Response* was written by:
   b. Masters and Johnson.
   c. John Bancroft.
   d. Dr. Ruth.

ANS: B  REF:  Nonexperimental Research Methods
OBJ:  02-10  MSC:  TYPE: Factual

54. Which of the following stimulus situations was NOT used in Masters and Johnson's research?
   a. coitus with a partner
   b. oral-genital stimulation
   c. masturbation
   d. breast stimulation

ANS: B  REF:  Nonexperimental Research Methods
OBJ:  02-10  MSC:  TYPE: Factual

55. Masters and Johnson's research findings would be LEAST likely to be applied in:
   a. conception control.
   b. infertility counseling.
   c. general sex education.
   d. the treatment of sexually compulsive behavior.

ANS: D  REF:  Nonexperimental Research Methods
OBJ:  02-10  MSC:  TYPE: Application
56. If you wanted information on how men and women respond physiologically during sexual arousal and orgasm, your BEST source of information would be:
   a. Masters and Johnson.
   c. the National Health and Social Life Survey.
   d. the National Survey of Sexual Health and Behavior.

   ANS: A  REF: Nonexperimental Research Methods
   OBJ: 02-10  MSC: TYPE: Application

57. The National Survey of Sexual Health and Behavior (NSSHB) survey included:
   a. the percentage of subjects who participated in same-sex encounters
   b. patterns of condom use
   c. more than 40 combinations of sexual acts engaged in during sexual events
   d. All of the above

   ANS: D  REF: Nonexperimental Research Methods
   OBJ: 02-07  MSC: TYPE: Factual

58. Most information about human sexual behavior has been obtained through:
   a. case studies.
   b. surveys.
   c. direct observation.
   d. the experimental method.

   ANS: B  REF: Nonexperimental Research Methods
   OBJ: 02-03  MSC: TYPE: Factual

59. A kind of sampling bias in which certain segments of society (such as White, middle-class, white-collar workers) are disproportionately represented in a study population is known as
   a. nonresponse
   b. demographic bias
   c. researcher bias
   d. volunteer bias

   ANS: B  REF: Nonexperimental Research Methods
   OBJ: 02-03  MSC: TYPE: Factual

59. A kind of sampling bias in which certain segments of society (such as White, middle-class, white-collar workers) are disproportionately represented in a study population is known as
   a. nonresponse
   b. demographic bias
   c. researcher bias
   d. volunteer bias

   ANS: B  REF: Nonexperimental Research Methods
   OBJ: 02-03  MSC: TYPE: Factual

59. A kind of sampling bias in which certain segments of society (such as White, middle-class, white-collar workers) are disproportionately represented in a study population is known as
   a. nonresponse
   b. demographic bias
   c. researcher bias
   d. volunteer bias

   ANS: B  REF: Nonexperimental Research Methods
   OBJ: 02-03  MSC: TYPE: Factual

59. A kind of sampling bias in which certain segments of society (such as White, middle-class, white-collar workers) are disproportionately represented in a study population is known as
   a. nonresponse
   b. demographic bias
   c. researcher bias
   d. volunteer bias

   ANS: B  REF: Nonexperimental Research Methods
   OBJ: 02-03  MSC: TYPE: Factual

60. A science writer hears of a 35-year-old male who lost his penis at circumcision. He interviews all family members, reads medical records, and writes a book about the topic. This is MOST likely an example of which of the following?
   a. case study
   b. survey method
   c. direct observation
   d. experimental method

   ANS: A  REF: Nonexperimental Research Methods
   OBJ: 02-02  MSC: TYPE: Application
61. One specific advantage of the case study method is that it allows:
   a. researchers to obtain large amounts of data in a short period of time.
   b. great flexibility in data gathering while allowing for precise control of variables.
   c. virtual elimination of the possibility of data falsification.
   d. for intensive study of a specific behavior.

   ANS: D  
   REF: Nonexperimental Research Methods
   OBJ: 02-02  
   MSC: TYPE: Application

62. Which of the following research methods allows us to draw cause-and-effect relationships?
   a. experimental method
   b. survey
   c. case study
   d. direct observation

   ANS: A  
   REF: Nonexperimental Research Methods
   OBJ: 02-02  
   MSC: TYPE: Factual

63. A direct consequence of the shift in funding sources from federal agencies to drug companies has been
   a(n):
   a. de-emphasis on the psychosocial aspects of human sexual functioning.
   b. improvement in women’s health.
   c. decline in integrity of scientific peer review.
   d. increase in the use of the experimental method.

   ANS: A  
   REF: Nonexperimental Research Methods
   OBJ: 02-07  
   MSC: TYPE: Factual  
   NOT: NEW

64. Which of the following statements regarding case studies is FALSE?
   a. They are often used to study atypical sexual behavior.
   b. They allow for flexible data gathering.
   c. The researcher is not easily able to generalize findings to broader populations.
   d. Masters and Johnson's research (Human Sexual Response) is an example of the case study method.

   ANS: D  
   REF: Nonexperimental Research Methods
   OBJ: 02-02  
   MSC: TYPE: Factual

65. Since case study evidence demonstrates that rapists often report high exposure to sexually violent pornography, we can conclude that:
   a. viewing violent pornography causes men to rape women.
   b. there may be an association between the exposure to violent pornography and rape.
   c. the rapists were sexually abused themselves as children.
   d. more legislation banning pornography should be passed.

   ANS: B  
   REF: Nonexperimental Research Methods
   OBJ: 02-02  
   MSC: TYPE: Application
66. One disadvantage to using the experimental method for research is that:
   a. subjects’ behavior can be influenced by presence of observer(s) or the artificial nature of the environment where observations are made.
   b. the artificiality of laboratory settings can result in bias.
   c. the accuracy of data is limited by fallibility of human memory.
   d. it is not suitable for many kinds of research questions.

   ANS: B  REF: Nonexperimental Research Methods
   OBJ: 02-02  MSC: TYPE: Factual

67. All of the following are limitations of the case study method EXCEPT the:
   a. memory distortions in recalling past events.
   b. difficulty in generalizing what is learned to the larger population.
   c. inflexible data-gathering procedures.
   d. inappropriateness for addressing many kinds of research questions.

   ANS: C  REF: Nonexperimental Research Methods
   OBJ: 02-02  MSC: TYPE: Factual

68. After helping two of her psychotherapy clients deal with the impact of viewing excessive amounts of pornography in their intimate relationships, Dr. Kamari began to grossly overestimate the negative effects of viewing sexually explicit materials. Dr. Kamari should be reminded of the limits of:
   a. case studies.
   b. surveys.
   c. self-selection.
   d. direct observation.

   ANS: A  REF: Nonexperimental Research Methods
   OBJ: 02-02  MSC: TYPE: Application

69. An advantage of the survey method of research is that:
   a. problems with nonresponse or demographic bias are not likely to occur.
   b. they are relatively inexpensive and data can be obtained from large groups of people.
   c. they provide great flexibility in data gathering procedures.
   d. they allow us to demonstrate causal relationships.

   ANS: B  REF: Nonexperimental Research Methods
   OBJ: 02-02  MSC: TYPE: Factual

70. Studies have shown that circumcision is one of many effective strategies for reducing the spread of:
   a. gonorrhea.
   b. HPV.
   c. syphilis.
   d. HIV/AIDS.

   ANS: D  REF: The Experimental Method
   OBJ: 02-11
   MSC: TYPE: Factual

   NOT: NEW
71. In the experimental method, the ____ variable is controlled by the researcher while the ____ variable is the outcome that the experimenter observes and records.
   a. dependent; independent
   b. independent; dependent
   c. random; representative
   d. representative; random

   ANS: B  REF: The Experimental Method  OBJ: 02-11
   MSC: TYPE: Factual

72. What is a major advantage of the experimental method?
   a. The ability to obtain in-depth information of behaviors, thoughts, and feelings
   b. The flexibility in data-gathering procedures
   c. Control over variables that influence the behavior being studied
   d. Anonymity

   ANS: C  REF: The Experimental Method  OBJ: 02-11
   MSC: TYPE: Factual

73. A group of college men is exposed to films with nonviolent sexual themes. A second group is exposed to R-rated films in which men commit sexual violence against women. Several days later, all men complete an attitude questionnaire. The results demonstrate that the second group of men is more accepting of violence toward women than the first group. What is the dependent variable in this study?
   a. the films with nonviolent sexual themes
   b. the films with sexually violent themes
   c. the subjects’ responses to the questionnaire
   d. the attitude questionnaire

   ANS: C  REF: The Experimental Method  OBJ: 02-11
   MSC: TYPE: Application

74. In one high school, condoms are freely available. In another similar high school, students must request condoms from the school nurse. The number of pregnancies among both groups of students are compared. The dependent variable is:
   a. the freely available condoms.
   b. the condoms available by request.
   c. the high school students from the first school.
   d. the number of pregnancies.

   ANS: D  REF: The Experimental Method  OBJ: 02-11
   MSC: TYPE: Application

75. Which of the following research methods would be MOST appropriate if you wished to examine the effects of different room temperatures on physiological sexual response?
   a. case study
   b. interview
   c. experimental research
   d. questionnaire

   ANS: C  REF: The Experimental Method  OBJ: 02-11
   MSC: TYPE: Application
76. A matched group of rapists and non-rapists listen to taped descriptions of sexual activity, one involving rape and the other involving consensual sexual interaction. The researcher measures the degree of penile engorgement in each group. The independent variable is:
   a. the taped descriptions.
   b. the penile tumescence among rapists.
   c. the penile tumescence among non-rapists.
   d. the group of nonrapists.

   **ANS:** A
   **REF:** The Experimental Method
   **OBJ:** 02-11
   **MSC:** TYPE: Application

77. Which of the following research strategies would provide the MOST effective way of demonstrating that sexually violent media may cause or contribute to some rapists' assaultive behaviors?
   a. the survey
   b. the experimental method
   c. direct observation
   d. the case study

   **ANS:** B
   **REF:** The Experimental Method
   **OBJ:** 02-11
   **MSC:** TYPE: Application

78. One of the best and most efficient ways to manage research data is through the use of:
   a. plethysmographs.
   b. Internet-based surveys.
   c. face-to-face interviews.
   d. myographs.

   **ANS:** B
   **REF:** Technologies in Sex Research
   **OBJ:** 02-13
   **MSC:** TYPE: Factual

79. One of the major drawbacks of Internet-based research is:
   a. the inability to keep track of data.
   b. the risk of sample-selection bias.
   c. the large numbers of people who respond.
   d. the inability to generalize results.

   **ANS:** B
   **REF:** Technologies in Sex Research
   **OBJ:** 02-13
   **MSC:** TYPE: Factual

80. Why are privacy issues especially acute when doing sex research in cyberspace?
   a. An IRB has no means to evaluate the research proposal.
   b. Anonymity can never be 100% guaranteed.
   c. Internet research is not required to follow ethical guidelines.
   d. Actually, privacy issues are not an issue when doing sex research in cyberspace.

   **ANS:** B
   **REF:** Technologies in Sex Research

   **MSC:** TYPE: Factual
82. The penile strain gauge:
   a. is designed to measure the amount of semen discharge.
   b. has the disadvantage that a trained professional must attach it.
   c. has been used to measure arousal in experimental research.
   d. has been developed only with the advent of 21st century technology.

ANS: C   REF: Technologies in Sex Research   OBJ: 02-12
MSC: TYPE: Factual

83. A written or self-administered questionnaire (SAQ) provides an alternative survey method that can overcome some of the difficulties of an IAQ by:
   a. minimizing participants’ risks.
   b. providing a controlled environment in which all possible influences on subjects’ responses, other than the factors that are being investigated, can be ruled out.
   c. minimizing literacy problems.
   d. providing a more private and potentially less threatening means of reporting sensitive behavior.

ANS: D   REF: Technologies in Sex Research   OBJ: 02-13
MSC: TYPE: Factual   NOT: NEW

84. At present, a “digital divide” exists, meaning that:
   a. the technology needed for research lags behind the needs of researchers.
   b. Internet users tend to be younger, better educated, and more affluent than nonusers.
   c. Internet users are still not representative of the general U.S. population.
   d. researchers conducting sex research on the Internet find it difficult to recruit hidden populations of geographically isolated participants.

ANS: C   REF: Technologies in Sex Research   OBJ: 02-13
MSC: TYPE: Factual   NOT: NEW

85. How many varieties of CASI technology are currently used?
   a. one
   b. two
   c. four
   d. five

ANS: B   REF: Technologies in Sex Research   OBJ: 02-13
MSC: TYPE: Factual   NOT: NEW

86. When an interviewer-administered questionnaire (IAQ) is used in sex research, the human element involved in a face-to-face encounter can influence the respondent to:
   a. overreport certain sensitive behaviors as well as more normative or socially acceptable behaviors.
   b. underreport certain sensitive behaviors as well as more normative or socially acceptable behaviors.
   c. underreport certain sensitive behaviors and to overreport more normative or socially acceptable behaviors.
   d. overreport certain sensitive behaviors and to underreport more normative or socially acceptable behaviors.

ANS: C   REF: Technologies in Sex Research   OBJ: 02-13

87. The penile strain gauge can measure:
   a. the strength of muscle contraction.
   b. galvanic skin response.
   c. body temperature.
   d. changes in penis size.

   ANS: D     REF: Technologies in Sex Research     OBJ: 02-12
   MSC: TYPE: Factual

88. Which one is NOT true concerning computer-assisted self-interview technology?
   a. It can be administered to those who are not literate.
   b. It can be done in private.
   c. It allows multilingual administration without requiring researchers to be multilingual.
   d. Key elements of questions' presentation and measurement are not standardized.

   ANS: D     REF: Technologies in Sex Research     OBJ: 02-12
   MSC: TYPE: Factual

89. One drawback of the Self-Administered Questionnaire (SAQ) is that:
   a. it does not provide a private means of reporting behavior.
   b. it is more threatening to the participants.
   c. it may be affected by the reading ability or literacy of the respondents.
   d. sensitive behaviors will not be reported.

   ANS: C     REF: Technologies in Sex Research     OBJ: 02-12
   MSC: TYPE: Factual

90. Which of the following is NOT an advantage of computer-assisted self-interviews?
   a. Respondents do not have to be literate.
   b. CASI is a less threatening way to report sensitive behaviors.
   c. Normative behaviors may be underreported.
   d. Question presentation can be standardized for all respondents.

   ANS: C     REF: Technologies in Sex Research     OBJ: 02-12
   MSC: TYPE: Factual

91. One limiting factor of using Internet-based research is that:
   a. it is considerably more expensive than traditional paper-and-pencil questionnaires.
   b. people responding to electronic surveys believe that their responses are less anonymous and secure.
   c. it is more time consuming.
   d. it is vulnerable to sample-selection bias.

   ANS: D     REF: Technologies in Sex Research     OBJ: 02-13
   MSC: TYPE: Factual

92. Which is NOT an advantage of Web based research?
   a. Cyberspace questionnaires are cheaper to distribute and collect.
   b. Data can be more quickly and efficiently sent to a database.
   c. Researchers do not need to address ethical issues because of the lack of contact with respondents.
   d. It may be easier to locate unusual populations not available locally.

   ANS: C     REF: Technologies in Sex Research     OBJ: 02-13
   MSC: TYPE: Factual
93. Surveys administered over the Internet may be especially useful because:
   a. participants can be recruited from distant places.
   b. it is easier to guarantee anonymity than with any other method.
   c. demographic bias is greatly minimized.
   d. response rates are much higher.

   ANS: A

OBJ: 02-14  NOT: NEW
25. One consideration to be aware of in evaluating a piece of research is whether a sufficient number of participants were used.

ANS: T  REF: Evaluating Research: Some Questions to Ask  OBJ: 02-15

SHORT ANSWER

1. One of the goals of a scientific discipline is to control or influence events. Discuss some reasons why this might be desirable in human sexuality and why this might be a matter of concern.

ANS:
Answer not provided.

REF: The Goals of Sexology  OBJ: 02-01

2. Would you yourself be willing to be a participating subject in a research project that investigated your sexual attitudes and your sexual behaviors? Why, or why not?

ANS:
Answer not provided.

REF: The Goals of Sexology  OBJ: 02-01 - 02-15

3. Name, describe, and compare and contrast the nonexperimental research methods discussed in your text.

ANS:
Answer not provided.

REF: Nonexperimental Research Methods  OBJ: 02-02

4. Describe and comment briefly on the evidence concerning the relationship between exposure to sexually violent pornography and rape.

ANS:
Answer not provided.

REF: Nonexperimental Research Methods  OBJ: 02-09

5. Identify the main types of survey research. Discuss the strengths and weaknesses of each.

ANS:
Answer not provided.

REF: Nonexperimental Research Methods  OBJ: 02-02
6. How has the research of Masters and Johnson contributed to our understanding of human sexuality? Include a consideration of methodology and subject population as well as the information obtained.

ANS: Answer not provided.

REF: Nonexperimental Research Methods OBJ: 02-10

7. Why might one choose to do an interview rather than administer a questionnaire? What are some reasons why information gathered in an interview might be erroneous?

ANS: Answer not provided.

REF: Nonexperimental Research Methods OBJ: 02-04

8. Explain how nonresponse or demographic bias will affect survey results.

ANS: Answer not provided.

REF: Nonexperimental Research Methods OBJ: 02-05

ANS: Answer not provided.

REF: The Experimental Method OBJ: 02-06 | 02-07

10. If a friend asked you whether or not it would be a good idea to participate in an anonymous Internet survey concerning sexuality, what would be your answer?

ANS: Answer not provided.

REF: Technologies in Sex Research OBJ: 02-02

11. What is a penile strain gauge? A vaginal photoplethysmograph? How are these devices used in research settings?

ANS: Answer not provided.

REF: Technologies in Sex Research OBJ: 02-12

12. Specify some potential advantages and potential problems with research conducted over the Internet.

ANS: Answer not provided.

REF: Technologies in Sex Research OBJ: 02-13
13. What are some of the ethical safeguards that are in place to protect participants in sexual research?

   ANS: Answer not provided.

   REF: Ethical Guidelines for Human Sex Research OBJ: 02-14

14. Identify and explain the basics of ethical research when using human subjects.

   ANS: Answer not provided.

   REF: Ethical Guidelines for Human Sex Research OBJ: 02-14

15. Specify at least four criteria for evaluating a piece of research.

   ANS: Answer not provided.
